ETI's Dig-Tol-Forum Discusses Digital Tolerancing Trends

Westland, Michigan — (Mar 18) - A digital tolerancing network created by Effective Training Inc. (ETI) allows users of model-based tolerancing to discuss the capabilities, technical and implementation issues, and uses of digital tolerancing information. ETI founder and GD&T expert Alex Krulikowski leads the discussion. Members are individuals who use various CAD systems and who are working on a transition from 2-D drawings to model-based tolerancing.

The Digital Forum is only one of the recent free resources added to the ETI website: www.etinews.com. Other resources include an online geometric dimensioning and tolerancing (GD&T) newsletter, a GD&T and ASME Standard-related discussion board, a tip of the month, a variety of tech papers, and a technical calendar of events.

To request membership in the forum, log onto the website.

Effective Training, Inc. is a world leader in the field of geometric dimensioning and tolerancing, having sold more than 100,000 books, videos, CD-ROMs, and other training materials worldwide.
