# ETI Begins Web-Based GD&T Training

WESTLAND, Michigan — (Aug 10) - Effective Training Inc. (ETI) adds web-based training to their extensive list of GD&T products and services. The new ETI Learning Center ([www.etilearn.com](http://www.etilearn.com)) provides online training in geometric dimensioning and tolerancing (GD&T) and ASME Standard-related courses.

The first e-learning course is the GM Addendum. It includes a description of the GM Global Dimensioning and Tolerancing Addendum used in the auto industry, with an in-depth look at the major areas of impact the Addendum has on drawings that use the ASME Y14.5M-1994 interpretation of dimensioning and tolerancing. The course also points out differences between the GM, Ford, and Chrysler GD&T addendums.

"Students can take the online course online at home or at work through a series of interactive lessons," said Alex Krulikowski, noted educator and author of GD&T training books and software. "Web-based training allows ETI to offer another convenient GD&T training method to our customers, whether individual students or large corporations." Krulikowski is the founder and president of Effective Training.

Over the next year, ETI will offer two more classes: GD&T Fundamentals and a GD&T overview. The classes are interactive and ETI offers student support through a discussion board and a variety of other resources at their website: <http://www.etinews.com>.

More information about the GM Addendum course and online registration is available at the ETI Learning Center site: <http://www.etilearn.com>.

Effective Training, Inc. is a world leader in the field of geometric dimensioning and tolerancing, having sold more than 50,000 books, CD-ROMs, videos and other training materials worldwide.
