ETI Releases Tolerance Stacks Instructor's Kit on CD-ROM

ETI's new training software contains everything needed to teach tolerance stacks on one self-running CD-ROM.

Westland, Michigan — Effective Training announces the third in a series of digital kits for instructors, educational institutions, and organizations that develop their own GD&T training materials. *The Digital Instructor's Kit: Tolerance Stacks* contains everything needed to teach a course on tolerance accumulation studies (stacks) on one self-running CD-ROM. The software saves hundreds of hours of course preparation time and is a cost-effective and convenient alternative to developing training programs from scratch.

Exclusively from ETI, the materials in this advanced course teach how to calculate tolerance stacks, a crucial skill in today's competitive workplace. Students learn to solve problems in the design stage instead of the production stage. The course explains how to use tolerance stacks to establish part tolerances, analyze design, create process designs, use geometric tolerances in stacks, and much more.

The Windows-based program was designed by GD&T expert Alex Krulikowski for use with a computer and a multimedia projector. It includes over 450 full-color digital slides, reproducible course agendas, handouts and quizzes. The touch of a button reveals definitions and examples point by point. Drawing tools allow instructors to "digitally" draw on the slides. The lesson screens contain detailed drawings and graphics that illustrate concepts and help students understand how to apply stacks on the job. The reproducible course materials open instantly with *Adobe Acrobat Reader* and can be printed effortlessly. It uses keyboard or mouse navigation.

The Digital Instructor's Kit: Tolerance Stacks software is now available from ETI. Visit ETI's website (<http://www.etinews.com/digkit>) for more details, screenshots, and a free downloadable demo. ETI also provides versions that teach GD&T fundamentals and advanced concepts. Call 800-886-0909 to find out more about their educational discount.

Effective Training, Inc. is a world leader in the field of geometric dimensioning and tolerancing, having sold more than 70,000 books, CD-ROMs, videos and other training materials worldwide. To find out more about ETI products and services, call 800-886-0909. To view a complete catalog of GD&T- and Standards-related products, or to sign up for their free online newsletter, visit their website.
